A large pile of silver-colored balancing beads is scattered across a solid orange background. The beads are spherical and reflective, creating a sense of depth and texture. They are clustered in the lower-left portion of the frame, with many more smaller beads visible in the background.

# BALANCING BEADS

# magnum+

## The Benefits:

High-precision and continuously adapting on imbalances that appear as you drive.

They last for the entire life of the tire, unlike weights that can fall off.

Their installation is super simple. The savings in time is HUGE.

## Easy Installation:

According to the tire size, just toss-in a bag.
